Bruce,

Did you find what you needed o.k.?

-Jennifer

Bruce, once you get on the Portal, go to files, data, Round 2 data, surface water data. There is a zipped file - 2005-10-17_-_SCRA_04Nov_05Mar_Surface_Water that should have all the surface water data. I know the data includes x-y sample coordinates, contaminant data and conventional (e.g., hardness) data. I am not sure if includes temperature data. I will send a quick email to Gene Revelas to see where temperature data is kept.

Thanks, Eric

Hi Eric,

Thanks for the voice mail. I was looking for the individual surface water contaminant concentration data along with data as to date, temperature, etc. Jennifer gave me access to the portal but I can tell which file name(s) contain these data. Eventually I'd like to match the portal files to whatever data Windward used to evaluate the food web model but that can come later. If you could just point me toward the right file names, that would be great. Thanks.

Bruce
